Supplementary 1. Production of inflammatory cytokines IL-6 and IL-8 by ovarian cancer cells. Medium protein concentration of IL-6 in SKOV-3 (A) and CAOV-3 (B) and IL-8 in SKOV-3 (C) and CAOV-3 (D) after 24 hour incubation with Camptothecin (100 nM), Exendin-4 (50 nM), and GLP-1 (100 nM). Mean values ±SEM are shown. n=3-6 per group. *p<0.05, **p<0.01, ***p<0.001 TNF-α vs. different conditions. One-way ANOVA followed with Dunnett’s post-hoc.
