

Supplementary Table 4. Accuracy of different cut-off values of the prediction score

Cut-off value	Sensitivity	Specificity	PPV	NPV
0.43	95.9	93.8	94.6	95.3
0.59	95.2	96.9	97.2	94.7
0.68	93.2	97.7	97.8	92.7

Specificity, sensitivity, PPV and NPV are calculated for the different cut-off values. PPV, positive predictive value; NPV, negative predictive value.
