

**A****B**

**Supplementary Figure 3.** Pancreas mass (**A**) and body mass (**B**) of rats that underwent undisturbed pregnancies (CTL) or received dexamethasone between the 14th and 19th gestational days (DEX). Rats were euthanized on the 20<sup>th</sup> day of pregnancy (P20) or on the 3<sup>rd</sup> (L3), 8<sup>th</sup> (L8), 14<sup>th</sup> (L14) and 21<sup>st</sup> (L21) days of lactation. \*P<0.05 vs. DEX at the same time point (N=4).
